

## AC's VS CodeRush/Refactor Tools for SharePoint Developers v1.1

<http://www.andrewconnell.com/blog/articles/ProductivityToolsForSharePointDevelopers.aspx>

### General / Misc. Templates

<b>assemblyfullname</b>	Full name of an assembly, 4-part name.
<b>ftd</b>	Field type definition.
<b>newguid</b>	Generate a new GUID.
<b>webpartxml</b>	Generate contents of a *.webpart file, automatically filling in the Web Part's type (5-part name) if it finds one within the current project.

### Feature Definition Schema Templates

<b>fxml</b>	Feature definition file contents.
<b>frxml</b>	Feature definition file for Feature receiver. If type inheriting Microsoft.SharePoint.SPFeature is found in the class, both the type and assembly full name are automatically filled.
<b>fwxml</b>	Feature definition file for Feature containing custom workflow that utilizes InfoPath forms.
<b>fxml</b>	Feature definition file contents.
